Subject: RE: S.H. Bell Company Chicago S. Avenue O Terminal - Monitoring and Siting

Hello Scott:

Thank you for sending in your monitoring and siting plan for the FRM and FEM monitors at the SH Bell Chicago Terminal. We have some initial questions prior to approval.

First, could you provide a justification for your choice of location for each monitor site?

We view the location of SH Bell's main office to be a prime siting location and would like to understand why SH Bell did not propose that location. Could you please indicate whether SH Bell considered the main office site (which already has an electricity source) as a siting location for monitors?

Did SH Bell consider a site between the two buildings on the southern facility boarder? EPA's preference would be to merge the two monitors on the southern border and locate one monitor there, and to use the main office location as the site for one FRM monitor and one FEM monitor.

We'd like to get your reply to these questions by COB January 18th, so that we can expedite approval of the plan. If it is easier to have a discussion about this, we are available tomorrow and Friday for a conference call.

Also, please refrain from forwarding any further correspondence to Katherine Owens. She is no longer with Air Division.

We look forward to hearing from you.

Best,

Nicole Cantello
